Education and Training

Master of Science in Microbiology
Jagannath University

Dhaka, Bangladesh
2019—2020

- Relevant Coursework: Genomics, Proteomics, Bioinformatics, Research Methodology and Scientific Writing

Bachelor of Science in Microbiology
Jagannath University

Dhaka, Bangladesh
2016—2019

- Relevant Coursework: Biostatistics, Public Health and Hygiene, Bioinformatics I, Bioinformatics II

Specialized Training: AI in Public Health
Child Health Research Foundation (CHRF)

Dhaka, Bangladesh
2023

- Acquired Skills: Epidemiological Modeling, Disease Surveillance using AI, Time Series Analysis (LSTM, ARIMA), Medical Image Analysis (X-ray, MRI)

Research Experience

Visiting Researcher
Department of Public Health, Daffodil International University

Dhaka, Bangladesh
2025– Present (Part-time)

- Collaborated with DIU faculty and students on ongoing research projects, grant proposals, and publications in public health and health informatics, resulting in 2 manuscripts under preparation.
- Delivering workshops, online courses, and research mentorship to strengthen capacity building in public health research.

GBD Collaborator
Institute for Health Metrics and Evaluation

Washington, USA
2025– Present (Part-time, Voluntary)

- Contributed critical analytical feedback and statistical modeling to 4 Global Burden of Disease (GBD) studies, including one on routine childhood vaccination coverage published in The Lancet.
- Supported manuscript development and provided methodological input for 3 ongoing high-impact GBD papers (breast cancer, headache disorders, and mental disorders), all currently under peer review.
- Enhanced epidemiological insights by integrating and validating datasets from 190+ countries, improving the robustness of global health policy evidence.

Research Intern
International Center for Diarrhoeal Disease Research, Bangladesh

Dhaka, Bangladesh
Feb 2022—Jun 2022

- Designed and implemented a comprehensive search strategy across PubMed, Embase, and PsycINFO, screening 8,000+ articles to support a systematic review on intimate partner violence in South Asia.
- Streamlined the abstract screening process in Covidence, identifying 400+ potentially relevant studies.
- Conducted full-text screening of 120+ articles and extracted key variables for meta-analysis.
- Drafted a systematic review protocol based on PRISMA guidelines, ensuring methodological transparency and reproducibility.

Data Enumerator
School of Allied Health, Curtin University

Australia
Oct 2022—Nov 2022

- Collected both quantitative and qualitative data from 40 Bangladeshi doctors for a Delphi study on Patient Outcomes Measurement in Interprofessional Tuberculosis Care.
- Validated and cleaned all survey responses, achieving 100% accuracy in the final dataset.
- Enhanced the reliability of study outcomes by ensuring high-quality and complete data capture.

Team Member

<div style="text-align: right">*Australia*
2017—2019</div>

Bio-Bio-1: Bioinformatics Research Discussion Group

- Engaged in collaborative research discussions and pursued continuous learning opportunities in bioinformatics.
- Contributed to the design of training modules and preparation of learning content to support group activities.
- Took initiative in team projects and developed leadership skills through active participation.

Leadership Experience

Founder & Chief Executive Officer

Dhaka, Bangladesh
2025 - Present (Self-employed)

DeepBio Limited (C-202963/2025)

- Founded and lead a bioinformatics company specializing in cancer genomics, transcriptomics, and AI-driven healthcare solutions.
- Recruited and manage a multidisciplinary team of 13 scientists (4 CADD Scientists I, 5 Bioinformatics Scientists I, 4 Computational Biologists) to drive computational biology and bioinformatics research.
- Developed and implemented scalable bulk RNA-seq and single-cell analysis pipelines, enabling translational medicine and biomarker discovery for cancer and neurodegenerative diseases.
- Launched a professional training program in bioinformatics and computational biology, training 40 students across Bangladesh, Pakistan, India, and African countries to strengthen the regional talent pipeline.
- Established collaborations with academic and industry partners to expand computational biology research capacity in South Asia.

Founder & Executive Director

Dhaka, Bangladesh
2020 - Present (Self-employed)

Center for Health Innovation, Research, Action, and Learning - Bangladesh

- Founded and expanded a non-profit research institute empowering young scientists in public health, bioinformatics, geospatial health, and AI for health, now structured into 4 research divisions.
- Trained over 3,000 undergraduate students nationwide on the fundamentals of research methods, data science, and scientific writing.
- Published 20+ peer-reviewed articles in international journals (Q1, Q2) and presented 40+ conference papers, advancing knowledge in public health, bioinformatics, and health informatics.
- Guided the preparation of 15+ manuscripts currently under peer review, strengthening the pipeline of early-career researcher contributions.
- Secured collaborative partnerships with Thalassemia Foundation Bangladesh, One Health Lab, Jahangirnagar University and Sher-e-Bangla Agricultural University, and Michigan State University to foster capacity building in biomedical research across Bangladesh.

Teaching and Mentoring

Instructor

Dhaka, Bangladesh
2025 - Present (Part-time)

Micro-Credentials Academy, Daffodil International University

- Designed and delivered modules on AI for disease modeling, digital health, and biomedical informatics
- Coordinated training programs that reached diverse student groups, bridging computing and health sciences

Lead Organizer & Instructor

Dhaka, Bangladesh
2025 - Present (Part-time)

Professional Training in Bioinformatics and Computational Biology

- Developed a year-long, university-style program covering genomics, transcriptomics, single-cell RNA-seq, and AI in health, with 40 students enrolled from Bangladesh, Pakistan, India, and African countries.
- Led a team of 4 instructors and 8 teaching assistants and created real-world case study curricula, preparing students for professional research careers in bioinformatics and computational biology.

Program Lead

Dhaka, Bangladesh
2025 - Present (Part-time)

GSA Bioinformatics Internship

- Designed and taught a hands-on bioinformatics curriculum (Bash, R, RNA-seq, scRNA-seq) for interns annually.
- Mentored 5 research interns on an original project: Comparative pan-cancer transcriptomics meta-analysis, which uncovered shared and distinct transcriptional networks with pathway crosstalk in liver, kidney, pancreas, and gastrointestinal cancers for biomarker and therapeutic target discovery.

- Guided interns in RNA-seq meta-analysis, coding, and scientific communication, leading to conference abstracts and manuscript preparation.

Faculty
Center for Bioinformatics Learning Advancement and Systematics Training, University of Dhaka

Dhaka, Bangladesh
2023 - Present (Part-time)

- Designed and delivered specialized courses in Biomedical Machine Learning with Python (20 trainees), Data Science and Machine Learning for Biologists (100+ enrolled), and School of Bioinformatics (15 trainees).
- Supervised student research projects applying ML frameworks to biomedical datasets, guiding participants toward publication-ready outputs and conference presentations.

Teaching Assistant (TA)

Department of Microbiology, Jagannath University

Dhaka, Bangladesh
Oct 2022 - Dec 2022 (Part-time)

- Assisted in preparing and delivering lectures, course materials, and assessments for 40 undergraduate students in Public Health & Hygiene.
- Mentored students on a public health project, providing guidance on research design, data analysis, and presentation skills.
- Supported faculty in student evaluation and academic advising, fostering stronger student engagement with departmental activities.

Quantitative Microbial Risk Assessment from Vancomycin-Resistant Enterococcus faecalis and Enterococcus faecium from a Specific Neighborhood in Dhaka City, Bangladesh. 36th Bangladesh Society of Microbiologists Annual Conference, Shahjalal University of Science and Technology (SUST), Sylhet, Bangladesh, January 2023.

Talks

1. **Computational Biology and Bioinformatics Research in Resource-Limited Settings: Strategies, Tools and Opportunities** (2025). Speaker, Jagannath University Higher Study and Research Society. In this talk, I delivered the strategies and techniques essential for mastering computational biology and bioinformatics research.

2. **Mastering Biomedical Data Management** (2024). Speaker, IFMSA Bangladesh, Dhaka, Bangladesh. In the era of big data and advanced technologies, the management of biomedical data presents both immense opportunities and significant challenges. In this talk, I explored the strategies and techniques essential for mastering biomedical data management.

3. **Undergraduate Research - Importance, Benefits, and Challenges** (2022). Speaker, CHIRAL Bangladesh, Dhaka, Bangladesh. This talk was designed to enhance the undergraduate research experience by focusing on critical communication skills for success in research and broad transferable professional skills.

4. **State the Art of Microbial Genome Analysis** (2022). Speaker, Jagannath University, Dhaka, Bangladesh. This talk was about the art of genomic data analysis. I explored genomic data analysis steps typically include data collection, quality check and cleaning, processing, modeling, visualization and reporting.

Projects

DeepTrust AI (Prototype)   *Dhaka, Bangladesh*
https://deeptrustai.deepbioltd.com/   *DeepBio Limited*

- Led the development of DeepTrust AI, an AI-powered tool designed to detect and counter health misinformation, addressing a critical public health challenge in Bangladesh.
- Built and showcased a functional prototype with natural language processing and credibility scoring features.

GenMed AI (Prototype)   *Dhaka, Bangladesh*
https://genmedai.deepbioltd.com/   *DeepBio Limited*

- Directed the design of GenMed AI, an AI-driven platform to accelerate drug discovery by analyzing disease data, identifying protein targets, and generating therapeutic compound designs within minutes instead of years.
- Developed prototype models integrating bioinformatics pipelines and generative AI frameworks.

Skills

Programming & Data Science
Python, R, Julia, SQL; PyTorch, TensorFlow, scikit-learn, PyCaret

Bioinformatics
Bulk RNA-seq (FastQC, STAR, HISAT2, Salmon, Kallisto, DESeq2); Single-cell RNA-seq (Seurat, Scanpy, CellRanger); Nextflow, Docker

Multi-omics Integration
Harmony (integration)

Other Tools
UNIX/Linux, Git
