RESEARCH INTERESTS

My research focuses on deciphering how the spatial architecture of the tumor microenvironment drives therapeutic resistance, using single-cell genomics, spatial transcriptomics, and graph-based machine learning.

RESEARCH EXPERIENCE

Founder & Executive Director, CHIRAL Bangladesh, Dhaka, Bangladesh — Jun 2020 – Present

- Directed computational oncology studies evaluating biomarker expression and patient survival across clinical cohorts.
- Co-authored five peer-reviewed papers in Q1/Q2 biomedical journals assessing clinical disease burden indicators.
- Mentored ten undergraduate and graduate researchers in biostatistics, transcriptomics, and reproducible workflows.
- Engineered automated analytical pipelines in R and Python for cross-cohort epidemiological risk stratification.

Visiting Scholar, Dept. of Public Health, Daffodil International University, Dhaka, Bangladesh — Sep 2025 – Present

- Spearheaded epidemiological modeling studies evaluating chronic disease burden indicators and health disparities.
- Designed automated R workflows for multi-source national survey synthesis and population-level risk prediction.
- Mentored graduate and undergraduate public health students in study design and statistical data visualization.

Research Collaborator, Kyung Hee University, Seoul, South Korea — Sep 2026 – Present
Collaborator: Yeon Ju Kim, Ph.D.

Project 1: Single-Cell Transcriptomic Identification of Alzheimer's Disease Associated Molecular Targets and CNS–Peripheral Immune Signatures for Experimental Validation and Therapeutic Intervention

Project 2: Single-Cell Multi-Organ Profiling to In Vivo Validation: Identification of Hyperglycemia-Associated Gene Signatures and Their Modulation by GV1 in ObT2D Mice

- Developed single-cell workflows to uncover cell-type-specific targets prioritized for wet-lab validation.
- Integrated bulk RNA-seq and machine learning models to characterize perturbed pathways and disease signatures.
- Guided 5 wet-lab lab members in single-cell data analysis with Python/R.

Research Collaborator, Lamar University, Beaumont, TX, USA — 2026 – Present
Collaborator: Iqbal Mahmud, Ph.D.

Project 1: EWSAtlas: A Harmonized Single-Cell Transcriptomic Atlas of Ewing Sarcoma

Project 2: Unified Single-Cell Atlas of Diffuse Midline Glioma (DMG)

- Independently conceptualized and built single-cell workflows to harmonize multi-cohort cancer atlases.
- Dissected neurodevelopmental lineage stalling programs, malignant cell plasticity, and microenvironmental niches.
- Collaborated with Dr. Iqbal Mahmud to translate computational findings into oncogenic mechanisms and targets.

Research Collaborator, One Health Lab, Jahangirnagar University, Dhaka, Bangladesh — 2024 – Present
Collaborator: Prof. Md. Salequl Islam, Ph.D.

Project 1: Genomic Profiling of Extended-Spectrum Antimicrobial Resistance Genes (ARGs) and Mobilizable Resistance Determinants in Industrial Effluents

Project 2: One Health Assessment of Antimicrobial Usage, Microbial Dynamics, and Resistance Transmission Pathways Across Poultry Farm Environments and Farm Workers in Bangladesh

- Profiled whole-genome sequencing (WGS) and metagenomic assemblies to identify resistance genes in wastewater.
- Developed reproducible workflows for resistome profiling, quantifying horizontal gene transfer risks in effluents.

Research Intern, icddr,b, Dhaka, Bangladesh Feb 2022 – Jun 2022
Advisor: Dr. Kamrun Nahar Koly
Project: Systematic Review and Evidence Synthesis in Intimate Partner Violence

- Formulated systematic review protocols following PRISMA guidelines to evaluate violence prevention interventions.
- Screened and cataloged over 8,000 publications across PubMed, Scopus, and Web of Science using structured criteria.
- Extracted quantitative and qualitative epidemiological indicators into standardized databases for synthesis.
- Assessed methodological quality and risk of bias across observational studies to ensure evidence synthesis rigor.

Research Associate, Bio-Bio-1 Research Group, Dhaka, Bangladesh Jan 2017 – Dec 2019

- Constructed compartmental models to simulate Chikungunya virus transmission dynamics in urban settings.
- Analyzed epidemiological surveillance datasets and climatic variables to evaluate seasonal transmission risks.
- Organized weekly computational biology journal clubs, facilitating critical appraisals of NGS methodologies.
- Instructed foundational bioinformatics workshops covering sequence alignment, phylogenetics, and Unix scripting.

ACADEMIC CREDENTIALS

Master of Science (M.S.) in Microbiology 2019 – 2020
Jagannath University Dhaka, Bangladesh
Advisor: Dr. Syeda Tasneem Towhid

- **Capstone Project:** Genomic surveillance, epidemiology, and outbreak response frameworks for Chikungunya.
- **Core Coursework:** Genomics & Bioinformatics; Advanced Molecular Genetics; Molecular Oncology; Biotechnology.

Bachelor of Science (B.S.) in Microbiology 2016 – 2019
Jagannath University Dhaka, Bangladesh
Advisor: Dr. Syeda Tasneem Towhid

- **Capstone Project:** Benchmarking whole-genome sequencing pipelines: a state-of-the-art performance review.
- **Relevant Coursework:** Bioinformatics I & II; Biostatistics; Molecular Genetics; Microbial Biotechnology.

CERTIFICATIONS & HACKATHONS

scverse × Cell Painting Hackathon 2026
scverse Consortium Berlin, Germany

Interdisciplinary Computational Biology 2026
BRAC University Dhaka, Bangladesh

Artificial Intelligence for Public Health 2023
Child Health Research Foundation (CHRF) & Bill and Melinda Gates Foundation Dhaka, Bangladesh

AI in Public Health 2022
DeepLearning.AI Online Specialization

TECHNICAL & COMPUTATIONAL SKILLS

Programming Languages: Python, R, Bash/Unix Shell, Rust, Julia, SQL, LaTeX

Single-Cell & Spatial Omics: Scanpy, scVI-tools, Seurat, Squidpy, CellRank, scVelo, CellChat, NicheNet, SoupX, DoubletFinder, CellBender, pySCENIC, Harmony, Slingshot, scArches, Human Cell Atlas

Bulk RNA-Seq & Genomics: metaXpress (lead developer), Salmon, DESeq2, edgeR, limma, clusterProfiler, ComplexHeatmap, biomaRt, EnhancedVolcano, BWA, Bowtie2, Samtools, GATK4

Pipelines & DevOps: Nextflow (DSL2), nf-core pipelines, Docker, Singularity, Git, GitHub Actions, Conda/Mamba

Machine Learning & AI: PyTorch, Scikit-learn, DeepChem, RDKit, NumPy, SciPy, Pandas

HPC & Cloud Computing: SLURM cluster computing (`sbatch`, `sarray`), AWS S3, Google Cloud Storage, Linux sysadmin

Laboratory Competencies: Microbial culture, aseptic technique, bacterial WGS DNA extraction fundamentals, PCR

PROFESSIONAL & WORK EXPERIENCE

Founder & CEO Jan 2025 – Present
DeepBio Dhaka, Bangladesh

- Directed an applied team of 40 computational biology researchers developing pipelines for oncology target discovery.
- Applied biological foundation models (scGPT, AlphaFold 3, Boltz-2) for perturbational and structural modeling.
- Built an interactive cloud platform providing GPU environments for high-throughput genomic analyses.
- Instructed over 1,000 students and researchers in bioinformatics workflows, Linux environments, and Python.

OPEN-SOURCE SCIENTIFIC SOFTWARE

Lead Developer & Maintainer 2025 – Present

metaXpress: End-to-End Bulk RNA-Seq Multi-Study Meta-Analysis R Package / Bioconductor

- Architected an R package unifying GEO ingestion, batch correction, and 6 statistical meta-analysis models.
- Implemented pathway meta-analysis and a Shiny explorer (**GitHub** | **Docs** | **Demo**).

TEACHING & MENTORING EXPERIENCE

Faculty (Bioinformatics) Aug 2023 – Present
cBLAST, University of Dhaka Dhaka, Bangladesh

- Delivered biomedical machine learning and data science training to 100+ graduate students and researchers.
- Developed hands-on HPC bioinformatics workshops for 10 participants using SLURM scheduling and containers.
- Evaluated student research capstones involving genomic variant calling, transcriptomics, and networks.

Program Lead & Mentor 2025 – Present
GSA Bioinformatics Internship Dhaka, Bangladesh

- Designed internship curricula and mentored 10 students in cancer genomics, spanning bulk and single-cell RNA-seq.

Program Lead & Instructor 2026 – Present
Bioinformatics Mentorship Program Dhaka, Bangladesh

- Designed a 12-week bioinformatics program, scaling enrollment from 7 to 50 students across cancer genomics.

Program Lead & Instructor Sep 2026 – Present
NextGen Drug Discovery with AI Dhaka, Bangladesh

- Launched a 3-month AI drug discovery program integrating molecular modeling, docking, and machine learning.

Program Lead & Curriculum Developer 2026 – Present
Agami AI Dhaka, Bangladesh

- Designed and delivered national AI literacy programs, reaching over 1,000+ secondary and college students.

Curriculum Developer & Instructor 2024 – 2026
ASI School of Life Dhaka, Bangladesh

- Designed and delivered an intensive 10-day bioinformatics curriculum, training 40 college students.

Teaching Assistant Oct 2022 – Dec 2022
Department of Microbiology, Jagannath University Dhaka, Bangladesh

- Delivered research methodology training to 40+ undergraduates and reviewed student research proposals.

HONORS, AWARDS & FELLOWSHIPS

Open Bioinformatics Foundation Event Fellowship, *Open Bioinformatics Foundation* 2026
International competitive grant to participate in single-cell and high-content imaging hackathon.

Scholarship Recipient, Artificial Intelligence in Public Health Workshop, *Bill and Melinda Gates Foundation* 2023
Competitive merit fellowship for intensive training in machine learning for epidemiological data.

Dutch-Bangla Bank (DBBL) Merit Scholarship, *Dutch-Bangla Bank Foundation* 2013
National academic scholarship awarded for academic distinction in Higher Secondary Certificate examinations.

LEADERSHIP EXPERIENCE

Founder & Executive Director Jun 2020 – Present
CHIRAL Bangladesh (Non-Profit Research Institute) Dhaka, Bangladesh

- Established an independent research institute with divisions in Computational Biology, Bio-AI, and Epidemiology.
- Supervised and co-authored over 20 peer-reviewed journal publications in oncology genomics and public health.
- Created a reproducible research framework incorporating Git version control, containers, and open-data standards.
- Conducted national capacity-building training programs in biostatistics and NGS analytics for 3,000+ participants.

COMMUNITY SERVICE

Nextflow Ambassador Jan 2025 – Present
Seqera Barcelona, Spain

- Promoted pipeline reproducibility and workflow automation globally as an appointed Nextflow Ambassador.
- Delivered national technical workshops training researchers in Nextflow DSL2 syntax and containerization.
- Assisted researchers with migrating custom transcriptomic scripts into scalable, cluster-ready pipelines.
- Authored open-source tutorials to lower entry barriers for high-performance computing in developing nations.

Senior Collaborator Jan 2025 – Present
Global Burden of Disease (GBD), Institute for Health Metrics and Evaluation (IHME) Seattle, WA, USA

- Collaborated with international working groups to estimate disease burden and mortality metrics globally.
- Co-authored global oncology studies published in *The Lancet* family of journals, including Breast Cancer.
- Evaluated regional epidemiological datasets and vital statistics for Bayesian meta-regression modeling.
- Reviewed methodological frameworks and statistical models for health metrics estimation across LMICs.

Life Member Sep 2026 – Present
Global Network of Bangladeshi Biotechnologists (GNOBB) Dhaka, Bangladesh

- Coordinated cross-institutional dialogues connecting domestic academic institutions with international scholars.
- Contributed to computational genomics seminars, advising early-career scholars on graduate research pathways.
- Promoted open-access research methodologies, shared bioinformatics resources, and standardized curricula.
