Md. Jubayer Hossain

Bioinformatics & Computational Biology · Prospective Ph.D. Student

hossainmj.me@gmail.com · mdjubayerhossain.com · linkedin.com/in/hossainmj · github.com/hossainlab

EDUCATION

Master of Science in Microbiology 2019 – 2020
Jagannath University Dhaka, Bangladesh

Bachelor of Science in Microbiology 2016 – 2019
Jagannath University Dhaka, Bangladesh

CERTIFICATIONS & HACKATHONS

scverse × Cell Painting Hackathon 2026
scverse Consortium Berlin, Germany

Interdisciplinary Computational Biology 2026
BRAC University Dhaka, Bangladesh

AI for Public Health 2023
Child Health Research Foundation (CHRF) Dhaka, Bangladesh

AI in Public Health 2022
DeepLearning.AI Online Specialization

TECHNICAL SKILLS

- **Programming Languages**: Python, R, Julia, SQL, Bash, JavaScript
- **Bioinformatics**: Bulk RNA-Seq (Salmon, DESeq2), Single-Cell (Seurat, Scanpy, CellChat, NicheNet, scvi-tools, rapids-singlecell), Spatial Transcriptomics (Squidpy), Multi-omics (Muon)
- **Workflow Management & Reproducibility**: Nextflow (DSL2), nf-core, Docker, Singularity, Git, GitHub
- **ML/DL in Biology**: GNN, Scikit-learn, PyTorch, RDkit, DeepChem
- **HPC & Cluster Computing**: SLURM (sbatch, sarray), Nextflow DSL2 with SLURM executor for scalable reusable pipelines
- **Cloud**: AWS S3, Google Cloud Storage for large genomic datasets

RESEARCH STATEMENT

Deciphering how spatial architecture within the tumor microenvironment drives therapeutic resistance by integrating single-cell multi-omics, spatial transcriptomics, and graph neural networks (GNNs).

TEACHING INTERESTS

- **Bioinformatics**: scalable, reproducible computational pipelines for single-cell, spatial, and bulk transcriptomics to elucidate complex disease biology.
- **Life Sciences AI**: Applying deep learning and foundation models to single-cell genomics data for high-accuracy predictive modeling.
- **Agentic AI in Biology**: Autonomous AI agents for hypothesis generation, multi-step workflow orchestration, and automated bioinformatics analysis.

RESEARCH EXPERIENCE

Founder & Executive Director Jun 2020 – Present
CHIRAL Bangladesh (Institute for Volunteering Research) Dhaka, Bangladesh

- Founded an independent voluntary research institute and established national and international research partnerships.
- Instructed 3,000+ students in research methodology and bioinformatics through virtual training programs.
- Managed 50+ volunteer undergraduate research assistants on active computational biology and public health projects.
- Led collaborative teams to produce 20+ peer-reviewed publications with undergraduate co-authors.

Visiting Scholar Sep 2025 – Present
Dept. of Public Health, Daffodil International University Dhaka, Bangladesh

- Developed strategic collaborative initiatives to expand public health research output.
- Planned and executed epidemiological workflows to investigate emerging community health challenges.
- Wrote 5 peer-reviewed collaborative articles published in Q1/Q2 international journals.

Research Collaborator Jul 2026 – Present
Kyung Hee University Seoul, South Korea
Collaborator: Yeon Ju Kim, Ph.D.

Project 1: Single-Cell Transcriptomic Identification of Alzheimer's Disease Associated Molecular Targets and CNS–Peripheral Immune Signatures for Experimental Validation and Therapeutic Intervention

Project 2: Single-Cell Multi-Organ Profiling to In Vivo Validation: Identification of Hyperglycemia-Associated Gene Signatures and Their Modulation by GV1 in ObT2D Mice

- Developed single-cell workflows to uncover cell-type-specific targets prioritized for wet-lab validation.
- Integrated bulk RNA-seq and machine learning models to characterize perturbed pathways and disease signatures.
- Taught single-cell bioinformatic workflows using Python and R to lab members of Professor Kim.

Research Collaborator Jul 2026 – Present
Lamar University Beaumont, TX, USA
Collaborator: Iqbal Mahmud, Ph.D.

Project 1: EWSAtlas: A Harmonized Single-Cell Transcriptomic Atlas of Ewing Sarcoma

Project 2: Unified Single-Cell Atlas of Diffuse Midline Glioma (DMG)

- Developed single-cell pipelines to harmonize multi-cohort transcriptomic atlases for Ewing sarcoma (EWSAtlas) and diffuse midline glioma (DMG).
- Characterized neurodevelopmental lineage stalling programs, malignant cell plasticity, and microenvironmental niches.
- Translated computational findings into oncogenic mechanisms and prioritized therapeutic targets.

Research Collaborator Jul 2026 – Present
One Health Lab, Jahangirnagar University Dhaka, Bangladesh
Collaborator: Md. Salequl Islam, Ph.D.

Project 1: Genomic Profiling of Extended-Spectrum Antimicrobial Resistance Genes (ARGs) and Mobilizable Resistance Determinants in Industrial Effluents

Project 2: One Health Assessment of Antimicrobial Usage, Microbial Dynamics, and Resistance Transmission Pathways Across Poultry Farm Environments and Farm Workers in Bangladesh

- Profiled whole-genome sequencing (WGS) and metagenomic assemblies to identify resistance genes in wastewater.
- Developed reproducible workflows for resistome profiling, quantifying horizontal gene transfer risks in effluents.
- Instructed lab members of Professor Islam in reproducible bioinformatics workflows and genomic data analysis.

Research Intern Feb 2022 – Jun 2022
International Center for Diarrhoeal Disease Research, Bangladesh Dhaka, Bangladesh
Advisor: Dr. Kamrun Nahar Koly

Project: Systematic Review and Evidence Synthesis in Intimate Partner Violence

- Formulated systematic review protocols following PRISMA guidelines to evaluate violence prevention interventions.
- Screened and cataloged over 8,000 publications across PubMed, Scopus, and Web of Science using structured criteria.
- Extracted quantitative and qualitative epidemiological indicators into standardized databases for synthesis.
- Assessed methodological quality and risk of bias across observational studies to ensure evidence synthesis rigor

Data Enumerator Oct 2022 – Nov 2022
School of Allied Health, Curtin University Australia
Collaborator: Bau DA Madjid

Project: Delphi Study on Patient Outcomes Measurement for Interprofessional Tuberculosis Care in Bangladesh

- Coordinated national-level execution of an international Delphi study evaluating interprofessional tuberculosis care in Bangladesh.
- Facilitated consensus gathering across iterative survey rounds, securing responses from 25 clinical specialists.

PROFESSIONAL EXPERIENCE

Founder & CEO Jan 2025 – Present
DeepBio Limited Dhaka, Bangladesh

- Founded and led DeepBio, applying foundational AI models to regional biological and healthcare challenges.
- Designed Project PROTIRODH to predict and rescue doomed beta-lactams against hospital-acquired infections.
- Established collaborations with Bangladeshi universities for experimental wet-lab validation.
- Launched "DeepBio Academy", upskilling 1,000+ undergraduates in bioinformatics and AI in life sciences.
- Launched "Agami AI", leading national AI literacy programs for 1,000+ school and college students.

TEACHING & MENTORING EXPERIENCE

Teaching & Training Roles

Faculty (Bioinformatics) Aug 2023 – Present
cBLAST, University of Dhaka Dhaka, Bangladesh

- Taught online workshops on biomedical machine learning with Python to 20+ participants.
- Developed self-paced courses on data science and machine learning for biologists on the cBLAST platform.
- Coordinated with Dr. Zeba Islam Seraj to advance accessible bioinformatics training initiatives.

Program Lead Jul 2025 – Present
GSA Bioinformatics Internship Dhaka, Bangladesh

- Designed the 6-month internship program and curriculum funded by ASI School of Life to train computational biologists.
- Mentored 10 interns across two cohorts in cancer genomics, bulk RNA-seq, and single-cell transcriptomics.
- Managed a multi-institutional team to mentor interns through independent research projects.

Curriculum Developer and Instructor Jan 2024 – Present
School of Bioinformatics Dhaka, Bangladesh

- Designed foundational bioinformatics curricula tailored for high school (grades 9–10) and college (grades 11–12) students.
- Taught introductory computational biology sessions across two student cohorts.
- Promoted early-stage bioinformatics literacy and scientific awareness among secondary and higher secondary students.

Teaching Assistant Oct 2022 – Dec 2022
Department of Microbiology, Jagannath University Dhaka, Bangladesh

- Delivered research methodology training to 40+ undergraduates and reviewed literature assessments.

- Reviewed and evaluated undergraduate research proposals, advising on study design.
- Guided undergraduate students data analysis practicals for the Public Health and Hygiene course

Courses Taught

DeepBio Academy

Next-Gen Drug Discovery with AI	2026
No-Code & Agentic AI for Life Sciences	2026
Reproducible Bioinformatics Workflows: Ideation to Execution	2026
Bioinformatics Mentorship Program (3 cohorts running)	2026
Single Cell Analysis with R: A Step-By-Step Guide	2025

Invited Lectures & Workshops

Statistical Analysis with R for Research (Two Cohorts), *Research Help Bangladesh*	2026
Statistical Analysis with R for Research, *Dept. of Pharmacy and CSE, Northern University Bangladesh*	2024
Statistical Analysis with R for Research, *Genetic Engineering Club, JnU*	2024
Statistical Analysis with R for Research, *Public Health Forum, Jahangirnagar University*	2024

CHIRAL Bangladesh

Publication-ready Tables with R	2025
Building Dashboard with R	2025
Easystats for Biomedical Researchers	2025
R for Bioinformatics	2025
Data Analysis with R	2025
R for Cancer Bioinformatics	2025
R for Research	2023
Machine Learning for Bioinformatics	2023
RNA-Seq Analysis with R	2023
AI for Drug Discovery	2023
Cancer Bioinformatics	2023
Python for Health Data Analytics	2023
Statistical Analysis with R for Research (14 Cohorts)	2020

MENTORING

1. **Dhruba Chowdhury** (2026), University of Dhaka: Cross-cohort validation of chemotherapy-induced TME remodeling
2. **Md. Aftabur Rahman** (2026), Jahangirnagar University: EBV-Antigen-Specific TCR Clonotype Fate in Nasopharyngeal Carcinoma
3. **Tahia Aswad Arony** (2026), North South University: Spatial Mapping of DMG Cell States onto Tissue Architecture
4. **Mahmuda Hoque** (2026), BRAC University: Chemotherapy-Induced Tumor Cell State Dynamics in Osteosarcoma
5. **Tasfia Nawar** (2026), BRAC University: Cross-Cohort Meta-Analysis of Acral Melanoma Immune Cell
6. **Md Shakil Ahamed** (2025), Mawlana Bhashani Science and Technology University: Bioinformatics Analysis of Transcriptomic Data Reveals Molecular Signatures Driving Colorectal Cancer
7. **Rahnuma Tabassum** (2025), Jagannath University: Integrated Transcriptomic Meta-Analysis Identifies Pathway Crosstalk and Therapeutic Targets in Hepatocellular Carcinoma
8. **Fayez Ahmad** (2025), Notre Dame College, Dhaka: Identification of Prognostic Biomarkers in Esophageal Carcinoma through Integrated Bioinformatics Analysis
9. **Sabbir Khan** (2025), Gazipur Agricultural University: Multi-Omics Meta-Analysis Identifies a Mitotic Signature as a Prognostic and Therapeutic Target in KIRC
10. **Lamisa Manha Aditee** (2025), BRAC University: Network-Driven Bioinformatics Approach Uncovers Prognostic Signatures and Therapeutic Targets in Pancreatic Ductal Adenocarcinoma

AWARDS & FELLOWSHIPS

Open Bioinformatics Foundation Event Fellowship, *Open Bioinformatics Foundation* 2026
Travel Grant for scverse x cellpainting Hackathon, *scverse* 2026
Scholarship for AI in Public Health Workshop, *Bill and Melinda Gates Foundation* 2023
Dutch-Bangla Bank (DBBL) Merit Scholarship, *Dutch-Bangla Bank* 2013

COMMUNITY SERVICES

Life Member Sep 2026 – Present
Global Network of Bangladeshi Biotechnologists (GNOBB) Dhaka, Bangladesh

- Promoted national and international biotechnology networking to foster scientific exchange and partnerships.
- Facilitated collaborative research initiatives connecting Bangladeshi biotechnologists worldwide.
- Provided computational biology mentorship and professional guidance to emerging life science researchers.

Member Jan 2017 – Dec 2019
Bio-Bio-1:Bioinformatics Research Discussion Group Dhaka, Bangladesh

- Delivered technical bioinformatics workshops for student and researcher discussion groups.
- Contributed to mathematical modeling of chikungunya transmission dynamics and epidemiological analysis.
- Engaged in regular scientific discussions and peer review of computational biology research topics.

Nextflow Ambassador Jan 2025 – Present
Seqera Barcelona, Spain

- Advocated for scalable and reproducible bioinformatics workflows utilizing Nextflow and nf-core standards.
- Organized and delivered hands-on workflow engineering workshops for the Bangladeshi bioinformatics community.
- Mentored local researchers and students in adopting cloud computing and modern pipeline automation.

MEDIA COVERAGE

1. May 27, 2024, **The Business Standard**: Quoted in article What the rise in self-medication tells us about the country's healthcare system.
2. Feb 08, 2024, **The Business Standard**: Study featured in article "Parental lack of antibiotic knowledge imperils child health in Bangladesh: Study".
